Information is subject to change without notice. Northern Telecom reserves the right to make changes in design or components as progress in engineering and manufacturing may warrant. This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules, and the radio interference regulations of Industry Canada. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at their own expense.

SL-1 and Meridian 1 are trademarks of Northern Telecom.

Revision history

January 29, 1990

Standard, release 1.0.

July 31, 1990

Standard, release 2.0.

December 1, 1991

Standard, release 3.0. This document is reissued to include technical content updates. Due to the extent of the changes revision bars are omitted.

December 31, 1992

Standard, release 4.0. This document is reissued to include information on system option 81 and equipment required for compatibility with X11 release 18. Only new information and changes to technical content are noted by revision bars in the margins.

Note: Product description information is provided in *Meridian 1 system overview* (553-3001-100). That information was formerly duplicated in this document.

April 1, 1993

Standard, release 5.0. Changes to technical content are noted by revision bars in the margins.

September 1, 1993

Standard, release 6.0. Changes to the document are noted by revision bars in the margins.

April 1, 1994

Standard, release 7.0. Added references to option 61C systems. Changes to the document are noted by revision bars in the margins.

December 1994

Standard, release 8.0. This document is reissued to include information on the Small systems Multi-Disk Unit (SMDU), Meridian 1 option 51C, and minor edits. Changes to technical content are noted by revision bars in the margins.

July 1995

Standard, release 9.00. This document is reissued to include international information to create a global NTP, option 81C, text and graphic edits. Changes are noted by revision bars in the margins.

December 1995

Standard, release 10.00. This document is reissued to include NT9D19 Call Processor Card and minor edits. Changes are noted by revision bars in the margins.

August 1996

Standard, release 11.00. This document is reissued to include NT9D19 Call Processor and NT6D66 Call Processor memory requirements for X11 Release 22. Changes are noted by revision bars in the margins.

October 1997

Standard, release 12.00. Changes are noted by revision bars in the margins.
